

Pre/Post Operative Instructions for Laser Hair Reduction

Division of Plastic Surgery
University Surgical Associates
Dr. R. Michael Johnson

Pre Treatment

Shave the area to be treated 24 hours prior to treatment. DO NOT use any hair removal creams or lotions.

DO NOT apply any creams, lotions, sprays or make-up to area.

Wear or bring clothing appropriate for treatment area. The area will be cleansed with mild soap and alcohol before treatment.

If you have been tanning or using self-tanning agents, please inform the doctor or office staff right away.

Post Treatment

Following treatment of the axillae use spray deodorant for 2 weeks or until you notice that the hair follicles have fallen out.

For other areas that were treated, try not to use any heavy creams, lotions or heavy makeup over areas for 2 weeks or until you notice that the hair follicles have fallen out.

If you have any questions please contact Cyndi at our office at 937-208-4188. If Cyndi is unavailable please call 937-208-2552 and ask for Tahira.

A follow up appointment is needed on _____.
